RAVAL

ACS LTD

About Us

Raval is both an established and well-known industry leader and a creative, fast-paced innovator. With one foot firmly planted in automotive flow management solutions and the other in emerging EV (electric vehicle), autonomous driving, smart mobility, and medtech markets, we deliver not only today's cutting-edge technologies – but also tomorrow's innovations.

Leading Today, Creating tomorrow

STANDARD

Check Valves

90° NIPPLE

30° NIPPLE

180° NIPPLE

Raval manufacture and supplies variety of Check Valves (CV). our standard CV are made of PA66 or POM. customer oriented and customized design offers Nipple size of 6, and 10 mm. Booster diameter range of 6, 8, 10 and 13 mm.

3 way Check Valves

A partnership you can build on

Raval provides a customer tailored products. our 3 and 4 way valves has been design to meet customer functional and design requirements. nipples size and orientation are adjustable.

Purge Valves Check Valves

custom made is our standard

Purge valves are essential component for the evaporative emission system. Raval provide purging check valve that can work at high and low vacuum.

our solution come as custom designed based on customer requist.

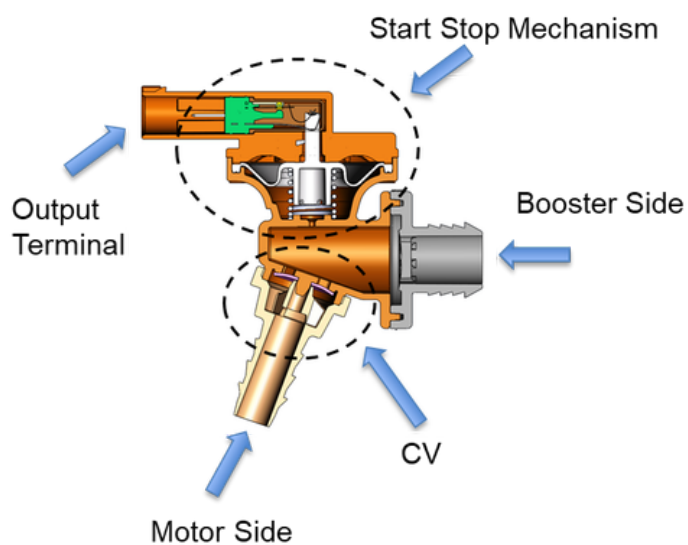

nipple size is diverse and build to match requirements.

STOP & GO Check Valves

A partnership you can build on

Raval's global reach and flexibility enable it to build true partnerships with its customers, collaborating on innovative developments that address both present and future needs.

As a Full Service Supplier (FSS), we offer top-quality, worldwide engineering support with zero PPM, on-time delivery, and quick response to all queries and requests

Raval's innovative CHECK VALVES

As the world shifts towards electrification, NEV (new energy vehicles), and smart mobility, Raval is leveraging its ability to rapidly assimilate and develop new technologies in order to expand its activities within the automotive industry and beyond. Raval investing on developing new type of Check Valves that includes a multi sensor able to measure pressure , temp and on demand measurements as per customer requirements.

modern Check valves for Stop and Go systems.

Ventori / Purge Check Valves

Ventori design integrated to standard fuel check valve. this type of check valve is also developed to combine a check valve and Purge ejector in one product. this Ventori check valve is designed according to fuel system standards.

Raval produces diverse CVs with a wide range of nipple dimensions suitable for different type of connection methods. our CV withstand a high-temperature environment and a harsh surrounding .

Coolant Check Valves

Quick coolant connector used for EV battery cooling system.

the quick conector has anti slip feature that prevent coolant flow once it disconnected.

Cooling system check valve that allow flow in one direction. it maintain pressure in the system while the pump is not operating.
